## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, and 13-16, drawn to a Common Carrier System, classified in class 705, subclass 1.
  - II. Claims 17-26, 32 and 37-51, drawn to a System and method for the exchange and display of information, classified in class 705, subclass 1.
  - III. Claims 27-31, drawn to a user interface with multiple regions, classified in class 705, subclass 1.
  - IV. Claims 33-36, drawn to a Computer Network, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Invention I is a common carrier system with use of a common carrier interface for a user to create an electronic booking request. Invention II is a System for accessing info, which does not require a carrier interface, and has first and second computer system, which is not present in Inventions I, III or IV. Invention III is a user interface which has first, second and even third regions of the interface, which is not present in Inventions I, II or IV. And Invention IV is a computer network, that does not claim any of the inventions (system or interfaces), of the claimed inventions of I, II or III.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III or IV, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention: If Applicant elects Group III above, the invention directed to the user interface, then an election of species must be done.

- a. Claim 28 is a separate and distinct species.
- b. Claim 29 is another separate and distinct species.
- c. Claim 30 is another separate and distinct species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 27 and 31 of Group III are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3629

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
